Software Version 11.1 – Configuration file update
Release Date September 28th, 2017

Note: All available materials through our Straumann® CARES® centralized milling production centers can be seen on the global Straumann web site:

New Products and Portfolio Extensions:
3M™ Lava™ Esthetic restorations:

Our Straumann® CARES® Portfolio is now extended with restorations milled out of 3M™ Lava™ Esthetic Fluorescent Full-Contour Zirconia. 3M™ Lava™ Esthetic is the first zirconia with inherent, tooth-like fluorescence for high-esthetic full-contour cases.

- High translucency, optimized for esthetic full-contour anterior and posterior restorations
- Excellent shade match to VITA® Classic shade with unique shading technology and built-in shade gradient.
- Durable full-contour. 800 MPa through and through*, indicated for crowns and bridges up to 3 units*
- Featuring a one-of-a-kind shading technology, 3M™ Lava™ Esthetic zirconia combines the esthetics of glass ceramics with high full-contour strength.

Courtesy of 3M Company
The 3M™ Lava™ Esthetic restorations are available for:

- restorations up to 3 unit bridges *
- in the high translucent multilayered shades A1, A2, A3, A3.5 and D2
- as of October 9th, 2017

Our CARES® Visual software offers the possibility to visualize the different material layers and position the restoration as wished to obtain an optimal aesthetic result with minimal processing and efforts.

Especially with 3M™ Lava™ Esthetic, the positioning of the restoration in the disc is easy due to its simple layer concept:

* 3-point bending strength according to ISO 6872:2015, please refer to the instructions for use for details
